2016/2017 session

AHMAD MUIZZ BIN SHARIFUL ANUAR
President of Islamic Dental Student Society
(PPIPUM) University of Malaya
2016/2017 session

First of all, we are truly grateful to the organising committee for being able to organize this event once again despite the busy schedule. We would also like to express our sincere thanks to the academic staff, support staff and student volunteers for making this event possible.

The Dental Students' Scientific Conference is a component of the elective project for final year dental students. It serves as a platform for students to conduct a research project under the supervision of an academic member. This allows students to familiarise themselves with research facilities that are available at our faculty. Through this exercise, students, especially final year students, have learnt to extend our appreciation to the dental researchers who have significantly contributed to new discoveries of dental materials, technology, technique, and knowledge. These efforts are what make dentistry a highly progressive profession.

Wishing everyone success and a fruitful conference and all the best to the presenters.
