

Dr. Lim Ghee Seong
Chairman Elective Project

Selamat sejahtera and greetings to all,

I am glad that this year's elective project has finally completed. Although there have been some hiccups and delays due to this COVID 19 pandemic. It has been proven that all our dear supervisors and students are capable of managing and coping with the changes due to this difficult time. Therefore, I would like to congratulate everyone for your hard work and great dedication in making this elective a success.

During the time of this unprecedented global event, it has impacted all aspects of our life such as living habits, working, leisure activities, education which includes the research activities. This year the 22nd Dental Student Scientific Conference (DSSC) which themed '**Beyond COVID 19: Dentistry in the New Norm**' is best described the current situation, where we have experienced some form of changes and adjustments to our research activities and the mode of presentations. Despite that, I truly believed that our students are capable of adapting to these changes and overcoming all the obstacles, in order to produce some good quality and impactful research. The DSSC this year will be held virtually; through this platform the students will be able to share their research findings. I truly wish that the students will appreciate and treasure this unique learning experience in the new era of virtual.

I would like to express my gratitude to all the fellow elective assessors who helped by giving their valuable and constructive feedback while marking and reviewing the elective reports. Not to forget my dearest committee members who have given their full and unconditional support in making this elective project a success this year.

Lastly, to my dearest year 5 students, cherish this moment and best of luck in your presentations.
