

## CHAIRPERSON

Elective Project Committee  
University of Malaya

Assalamualaikum wa Rahmatullahi wa Barakatuh.

Alhamdulillah and Congratulations to all students who have worked hard to complete their research project and submit the reports within the limited time. I would also like to extend the words of praise to their supervisors who have dedicated their time to guide and support their students.

We are very proud to learn that many of our students were able to maintain the standards of excellence in research, in line with the University's status as the top Research University in Malaysia. The theme for this year's conference which is "Serving Community Through Research" and fits well with the objective of the elective project course. By exposing our students to research, it has become our way to encourage them to continue their pursuit for knowledge in hope that the outcome of their discovery will be translated to enhance the quality of life of our community. The outcome of their research will be presented at this conference. Furthermore, their reports have gone through the Annals of Dentistry University of Malaya (ADUM) peer-reviewing protocols to identify publishable research. It is hoped that results of researches which have been deemed to be of high quality will be made available for all when they are published in local or international journals.

Finally, I would like to take this opportunity to all my committee members and the Editorial Board of ADUM for their continuous support in the smooth running of the elective project. Special gratitude to all assessors who have helped to thoroughly review and mark the reports.

All the best to the Year 5 Elective Project Students at the Conference!

Thank you.

Dr Wan Nurazreena Wan Hassan  
Chairperson  
Elective Project Committee 2014/15
